There is another similar software "Mailvacuum" called "mailvacuum generator" by Emysoft, the software is created to search email addresses from different popular mail users (Hotmail, Gmail etc) and store them in a database for direct selling. These are some key features of this software: Allows you to search any mail server, for example hotmail, gmail. You can perform unlimited email address searches. One search can be run at a time. Export the search results in a delimited text file. You can connect to the mail servers using the POP3/IMAP protocol. Advertisements will appear in your pop-up window, click here to get rid of them. It does not include any weird plug-ins and has absolutely no advertising and spamming. Disadvantages: Max. 5 uses at a time. Although you can select the mail server type, the software will do searches on both the Hotmail and Live account at the same time. Although these 09e8f5149f
