Launchy is a free and powerful application to enhance your start-up experience. Installed on your PC, you can quickly access all the programs you use on a daily basis. In order to search for programs and files on your computer, Launchy works with the Windows file search feature (see Help). It will show you the files that are currently active, that is, files that are currently being used by programs. Searching for documents, movies or pictures may take you to a specific folder. To the right of that folder, you will see a list of active (running) programs. Clicking on one of them, you will see a small window with the program name and the time it was last run. Click on the program icon in the list to launch the program. Launchy allows you to install shortcuts to programs and files. The shortcuts will appear in the search results, and clicking on them will launch the associated program. It is as easy as that. Search results can also be filtered to show only certain types of files, as well as to show only your files, or to show only programs, or only documents, or only images and videos. You may also choose from several methods to search. Additionally, Launchy can easily be customized. If you don't like the look and feel of the main window, you can change its appearance in the Options dialog. Also, you can change the theme of the program.
