The Adobe Photoshop Markup Language (PSD) file format is one of the most popular ways to view, edit, and create images for online and print publication. Photoshop supports the vast majority of editing and customization tasks necessary for print or web publishing. It's highly intuitive, and it enables designers to choose a typeface, palette, style, and style sheet to customize the look and feel of an image. A Photoshop template is created with a set of images that are installed on a user's machine. It enables them to have a shared set of images stored on their computer that they can customize and download as they create new images. This is a great tool for sharing and collaborating online. Adobe also provides online templates that enable you to download free Photoshop templates of stock photos from many different sources.

National Review National Review is an American political and cultural magazine founded in 1955 by William F. Buckley Jr. Its stated mission is to "Promote an American Conservatism dedicated to the principles that have made America the most 'e pluribus unum' nation in history." History The first issue of the original National Review was published in November 1955 with 25 pages covering events of the past year and two full pages of ads and subscriptions. Buckley and four of his friends wanted to create a monthly magazine that would espouse traditional American conservatism and thereby promote American interests, as they saw it, within the United States and abroad. Buckley edited National Review for the next 14 years, beginning with a circulation of approximately 5,000. The magazine's circulation soon grew to more than 100,000, with contributions from the likes of Milton Friedman, Barry Goldwater, Russell Kirk, and Richard Nixon. In 1961, the magazine joined with the American Conservative Union (ACU) to promote conservatism in U.S. politics. A number of conservative publications such as Chronicles and The Freeman have also modeled themselves after National Review. Buckley sold National Review to the conservative education group Independent Sector in 1966, largely because of financial difficulties, though sales improved. The magazine retained full editorial control throughout its history, with Buckley editing the magazine together with his frequent collaborator, L. Brent Bozell, Jr. In 1969, the journal gained notoriety after publishing an issue that showed nude photographs of former U.S. President John F. Kennedy. The magazine's managing editor, Frank Shakespeare, said, "All we wanted was another look at the naked President. The photos were, quite literally, everywhere." The magazine received permission from the photographer, Abraham Zapruder, to publish the photographs. The magazine has not lost its conservative credentials, and the most recent American Conservative Union Journal survey found National Review had a score of 79 out of 100, the highest rating of any conservative magazine. In 2000, the magazine merged with the conservative political movement, promoting conservative values in the political realm as well as traditional American ideals in the cultural realm. Publication details The magazine's published content is updated on a weekly basis, and its website allows readers to access articles via the Internet. It also offers daily newsletters and a "dine.write" service, which produces written products for businesses. An annual subscription costs \$50, and a single issue is available for \$3.95.
