Q: Is there a way to use regular expression to extract numbers between this formatting I'm using XPATH expression to extract data from HTML page, but I can't understand how to express this regular expression, here is an example of the kind of data I'm working with: 47.00 how could I express the part of HTML that I need to extract the data after the third float? 47.00 A: You need to use group():

```
//td[@class='rte'][3]/following::td[@title='Liters']/following::td[1]/text()
```

//td[@class='rte'][3] selects a td tag (which is the third td in tr) with @class 'rte'.

//following::td[@title='Liters']/following::td[1] then selects the child td with text 'Liters' of the previous node. //text() returns the text content. Akki seeks supporters for Rs 250 crore fund Here is an excerpt from the article published in Business Standard: Bangalore, May 18 (IANS) Akki Muthuraj, who has been put in the Union Ministry's priority watch list, has set up a Rs 250 crore fund to support those in distress due to the economic reforms, including those from the hinterland. The fund is being set up through an extensive network of friends, associates and corporate contributors, Akki said in an exclusive interview with IANS. "The (fund) is a lot different from a regular private equity fund or venture capital fund. I had that in mind," said Akki, founder-CEO of Akki Infoserve Private Equity Fund, who has earlier founded Swadhu IT Services. "If you have an asset of value, a software product or a brand, and you have a great business plan
